AMPENET
SOLUTIONS

Welcome
to our Company

Ampenet Solutions is a GPS Tracking, IT & Digital Solutions company founded on the basic principle of quality service delivery without compromise. We provide solutions and services for Tracking, Network Solutions, Graphics & Web Development, and Wireless & RF Engineering.

We tackle each project with an excellent customer-focused business approach whereby we walk the extra mile to ensure that we fully understand our client's ideas and nurture them with the latest market technologies to offer quality solutions.

Quality Driven
All projects that we undertake are always driven by the highest quality standards giving rise to world-class products and services.

Customer Focused
We prioritize our client's requirements ensuring that they get the services and solutions that are important and useful to them.

Business Value
By understanding your requirements, we provide you with solutions that allow you to keep your target audience and market in mind.

Service Delivery
We are passionate about understanding and meeting our clients' needs. Our extensive experience, knowledge and expertise combined with our exclusive supplier partnerships, gives us the flexibility to deliver against each client's strategic and operational requirements.

With our combined experience, we are able to analyze, design, and deploy customized solutions. We pride ourselves in our ability to meet toughest technological challenges.

GPS Tracking, IT & Networking World Class Solutions

GPS Tracking Solutions

Our GPS Tracking & Management Solutions are all about saving you money and creating opportunities to boost your bottom line every time your vehicles hit the road.

We endeavor to work closely with you to create customized vehicle tracking, cargo tracking, and fleet management solutions specifically for your vehicles and your unique needs.

After Sales Service

Our highly trained team of professionals go the extra mile to ensure that our clients are properly trained and educated on how to use the system effectively.

The technical team liases with the client to ensure routine check-ups are performed on time to ensure that the system continues to function efficiently as desired thus eventually improving the client's bottom line.

Our solutions are tailored to your specific requirements giving total control over your assets in real-time. The main categories include:

Vehicle Tracking & Tracing

Our solutions offer an efficient, effective system for managing your fleet. Our tracking devices deliver real-time information on the location and activity of your vehicles to improve business performance and customer service.

Fleet & Fuel Management

With our system's Fleet & Fuel data analytics, you will be able to understand your fleet, optimize operations and get more jobs done. Loaded with several features you will be able to minimize operational costs and maximize profits.

Cargo Tracking & Management

Secure your cargo while in transit with our cargo tracking solutions which work for any type of cargo like containers, loose cargo, and wet cargo. Track and monitor your cargo in real-time to and from the ports.

Heavy Machinery Tracking & Management

Secure and manage your heavy machines while in transit and as they work with our custom solution. This solution works for different types of machines and you're able to get a variety of statistics including work hours, fuel usage and driver behavior.

Which
tracking features do you get?

Each tracking solution category has some unique features that are essential to the client's needs. Here are the general features that come with our GPS tracking solutions:

- ✓ Real-time Track and Trace
- ✓ Online/Live Monitoring, Access via Web and Mobile App
- ✓ Multiple User Access
- ✓ Geo-fence, Routes and Points of Interest
- ✓ Immobilizer
- ✓ Scheduled Reports
- ✓ Customizable Reports
- ✓ Speeding Events
- ✓ Service Reminders
- ✓ Google maps
- ✓ Harsh Braking & Turn
- ✓ Acceleration
- ✓ Fuel Monitoring*
- ✓ Driver Management*

*Require additional hardware

Accessibility

Use the operating system of your choice: whether you use MacOS, Linux or Windows, launch a browser to start tracking.

Use your mobile smart devices: with our native mobile app you can start tracking your assets on an android or iOS smartphone or tablet.

Track important events by SMS and email: get notifications describing in detail what's happening with your assets.

Video Telematics Solution

Get even more control over your fleet with a vehicle video solution fully integrated with our GPS tracking system. Get a 360 degree and in-depth monitoring for the tractors, trailers, driver cabins, driver behaviors, vehicle status, etc. The main features include:

- ✓ H.265 High Efficient Video Recording & Compression
- ✓ 1080P Full HD 2* Embedded Wide Angle Camera (support max 4*CH)
- ✓ 4G Remote Live Streaming/Downloading (Compatible with 3G/5G)
- ✓ Alarm Video Upload to Cloud Server Storage Automatically
- ✓ Sleeping Mode for 7x24 hours Surveillance
- ✓ Driver Face Recognition & Local Identification (Update via FTP)

By integrating the video solution with our tracking platform, you are able to get full features of tracking, alarms and, most importantly, video/pictures, thus providing the most comprehensive safety and security services for users around the world.

Storage for the videos and pictures can be done through compatible SD cards or MDVRs depending on the video telematics solution in use.

There are two optional, external cameras offered for this solution that can be affixed in a variety of positions to monitor the activity at the back or sides of a vehicle, around an attached trailer or a fuel tank.

"See the road, your driver and your cargo being transported with your own eyes"

Graphics Design

Our Graphic Design team is always ready to utilize the process of visual communication and problem-solving through the use of typography, photography, and illustration to promote your business services and solutions eventually building your brand and increasing your sales. Our graphics design solution includes the following services:

- ✔ Business cards
- ✔ Flyers & brochures
- ✔ Company profiles
- ✔ 2D & 3D animations
- ✔ Business logos
- ✔ Brand identity

Bulk SMS Solutions

Bulk SMS is whereby a single message is sent to a large list of contacts at once by an individual, organization or business. Bulk SMS allows you to send a single, personalized text message to entire groups of people.

Our Bulk SMS system ensures that you reach your customers instantly via a simple and interactive interface. By scheduling a quick bulk SMS text you can save the time and effort of having to send the message one by one.

Get started in no time

We have an easy-to-use interface that will have you up and running in minutes! That means you can start texting your customers as soon as you register.

Perfect for any company size

It doesn't matter what size your organization is, text messaging is a valuable communication channel for start-ups, enterprise companies, and small businesses.

Web Design & Development

Since Web Design & Development encompasses many different skills and disciplines in the production and maintenance of websites, we ensure that our packages include all these services including web graphic design, interface design, authoring, including standardized code, user experience design, and search engine optimization.
